GARAGE AUTOMATION

Lotex have developed a range of quality garage door motors to conform to the highest standards expected from a Lotex product. Our range of motors are supplied with 2 four-button transmitter remotes, a wall mounted fixing bracket for ease of installation and a receiver to integrate your security gate with your newly installed garage door automation system. Optional accessories include a rechargeable battery backup, emergency key release, safety photo beams and a wireless key pad.

The range:

- 600N
- 800N
- 1200N

The Lotex one year warranty is supported by an extensive range of accessories and spares.

TECHNICAL SPECIFICATIONS

Our Lotex garage door opener has been tested extensively and upgraded to exceed market requirements. The Lotex powerhead is supplied with a 3.3 or 3.6 meter extrusion rail, two four-button transmitter remotes and all required fixing brackets.

OPTIONAL EXTRAS

- Rechargeable battery backup
- Emergency key release
