WHITEWOOD

Poplar is one of the most common utility hardwoods in the United States. It is valued for its versatility and workability, making it a popular choice for various applications.

### **Appearance**

White, sometimes with stripes.

Straight-grained and uniform in texture.

### **Properties**

Moderate to lightweight.

Medium density.

Machines and glues well, takes a variety of finishes effectively.

Stains very well, allowing for a range of aesthetic options.

### **Uses**

Commonly used in making furniture due to its workability and ability to take finishes. Ideal for crafting doors and millwork due to its stability and appearance

Frequently utilized in creating decorative items like baskets and frames.

Used as construction-grade lumber and plywood in various building applications.

Poplar is an excellent choice for both functional and decorative woodworking projects, appreciated for its adaptability and ease of use.
